

Hillrom™

Synclara™
Cough System

THE MOST COMPLETE COUGH SOLUTION

SYNCLARA™ COUGH SYSTEM

GOING THE EXTRA MILE FOR PATIENT HEALTH AND COMFORT

**For patients with compromised lung function,
cough simulation can be a lifesaving therapy.**

At Hillrom, we set out to make that therapy as effective and comfortable as possible. The Synclara™ Cough System is the result.

The Synclara Cough System uses Mechanical Insufflation-Exsufflation (MIE) technology to clear secretions from the upper airways.

We've added features that enhance individualization of therapy and patient comfort, such as Patient Synchrony and the novel Positive Air Pressure (PAP) on Pause. These patient-centric features, plus the support service Hillrom is known for, make the Synclara Cough System the most complete cough solution—for use from hospital to home.

We believe your patients deserve nothing less.

Advanced Patient Synchrony sensing technology automatically adjusts the cough cycle to patients' breathing patterns.

INDIVIDUALIZED CARE

Hillrom designed the Synclara™ Cough System to be easily individualized, so you can optimize treatment for a broad range of patients with complex and changing needs, in acute and homecare settings.

Delivery options

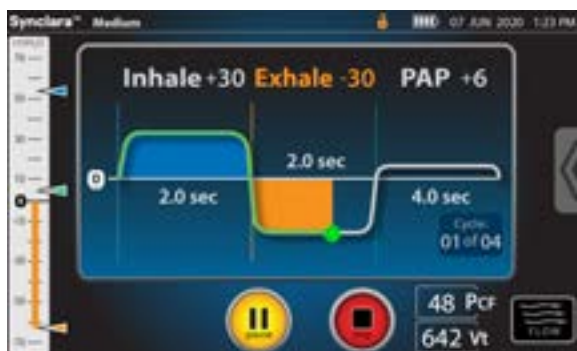

Choose from automatic or manual therapy delivery modes.

Note: Manual mode use in home setting determined by Hillrom certified trainer at time of training.

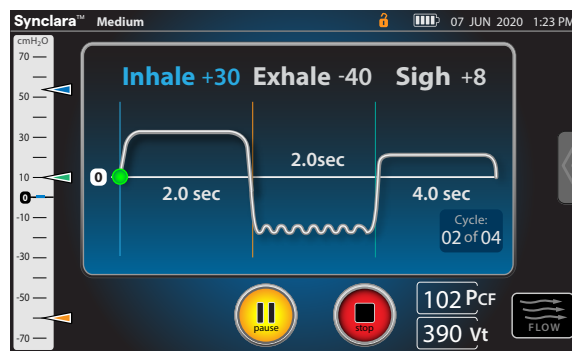

Programmable cycles

Up to 10 programmable cycles allow for individualized therapies for your patients.

PAP on Pause

Unique Positive resting Air Pressure feature delivers air between cough cycles, keeping the lungs open and helping improve patient comfort.

Flutter feature

Oscillations delivered to the upper airways during the cough cycle and pause phases help move mucus.

FLEXIBLE DESIGN

Adherence to treatment regimens is critical to improving outcomes, so the Synclara Cough System was designed to make therapy as easy and convenient as possible for patients and caregivers.

- 1 CIRCUIT WITH MULTIPLE INTERFACES**
Use with mask, mouthpiece or tracheostomy
- 2 PORTABLE**
Small and light, adaptable to virtually any setting
- 3 INTUITIVE TOUCHSCREEN**
Simple to navigate and operate, with preprogrammed protocols ready at the push of a button

Note: Manual mode use in home setting determined by Hillrom certified trainer at time of patient training
- 4 ACUTE CARE STAND**
Space-efficient, and easy to move throughout the hospital
- 5 SMART-FILTER™ WITH RFID**
The Synclara Cough System won't run without sensing the Smart-Filter with integrated RFID tag
- 6 BATTERY OPERATED (OPTIONAL)**
Take patients' therapy anywhere, with rechargeable battery or direct wall operation

INDUSTRY-LEADING SUPPORT

The Synclara™ Cough System comes equipped with care—the signature service Hillrom is famous for. We are there for patients and caregivers every step of the way, from working with payers to training, to therapy optimization and ongoing support.

REIMBURSEMENT SUPPORT SERVICES

Hillrom works directly with insurance providers so patients can have the therapy they need.

EDUCATION

We offer robust training programs for healthcare providers, as well as opportunities for respiratory schools, educators and students.

TRAINING

In-home training provided by a nationwide network of Hillrom trainers, enables caregivers and patients to get the most from their therapy.

OUTCOMES MONITORING

Includes follow ups with patients and caregivers after they've received training on the device.

24/7 CUSTOMER SERVICE AND PRODUCT SUPPORT

We're available around the clock, for peace of mind and better therapy outcomes.

Hillrom™

ABOUT HILLROM

Hillrom is a global medical technology leader whose 10,000 employees have a single purpose: enhancing outcomes for patients and their caregivers by advancing connected care. Around the world, our innovations touch over 7 million patients each day. They help enable earlier diagnosis and treatment, optimize surgical efficiency and accelerate patient recovery while simplifying clinical communication and shifting care closer to home. We make these outcomes possible through connected smart beds, patient lifts, patient assessment and monitoring technologies, caregiver collaboration tools, respiratory care devices, advanced operating room equipment and more, delivering actionable, real-time insights at the point of care. **Learn more at hillrom.com.**
