

MONARCH™

TAKE MORE
CONTROL
of your life

Cut loose.

A woman with short dark hair is smiling and looking down at a newspaper she is holding. She is wearing a red over-ear headset and a black vest with a device on the front. The vest has a small circular logo on the left side. She is wearing a light blue, ruffled top and dark pants. The background is a bright, indoor setting with a window and a plant in the foreground.

It can be hard to fit your therapy into your life, even though you know how important it is. The Monarch™ Airway Clearance System changes all that. Its revolutionary new technology clears your airways while allowing you to move about freely. **That lets you fit more in your day, do more of the things you love, and take more control of your life.**

Meet your new mobile device.

The Monarch™ system uses Pulmonary Oscillating Discs (PODs) to generate oscillations and targeted kinetic energy to your lungs. This airway clearance therapy helps thin mucus and increase airflow, mobilizing secretions from the airways while you're going about your day. So you no longer have to put your life on hold for therapy.

Rolling carrying case with telescoping handle and backpack strap options looks and feels like premium luggage.

Conveniently powered by a **rechargeable battery**.

Sportswear-inspired design is made to move with you.

Pendant control makes operating your Monarch system super simple.

Track your progress automatically through the **VisiView™ Health Portal**, using enabled WiFi or LTE connection.

PODs (Pulmonary Oscillating Discs) 8 independently operating PODs deliver targeted kinetic energy to your lungs.

Intuitive Mobile app available with Bluetooth® connectivity to let you control your Monarch system.

Select a **shell color** and pattern to make it yours.

Graphite Orange

Zesty Pink

Techno Red

Ocean Blue

Adventure Green

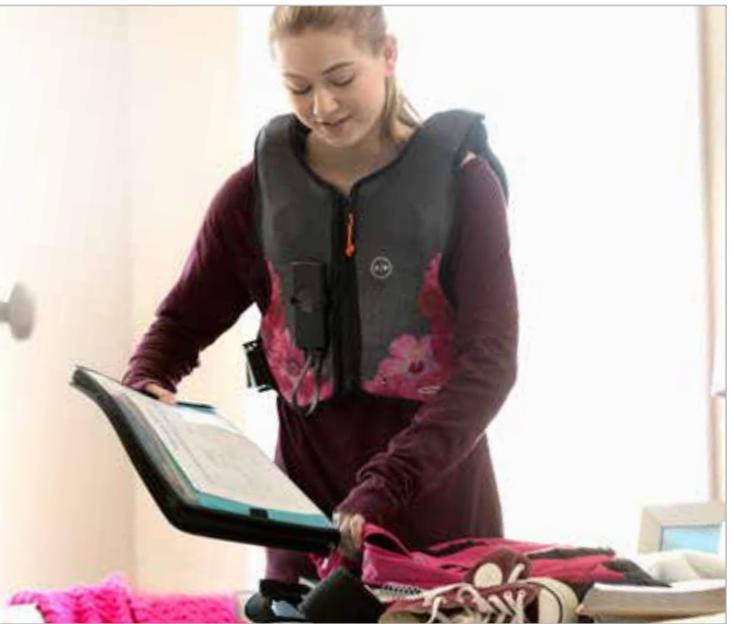

Like a fitness tracker for your lungs.

Enabled with either LTE or WiFi, the Monarch system keeps you wirelessly connected to your care team through the VisiView Health Portal, so you don't have to keep manual records of your therapy sessions. This streamlines your routine and helps your team work with you to tailor your treatment plan.

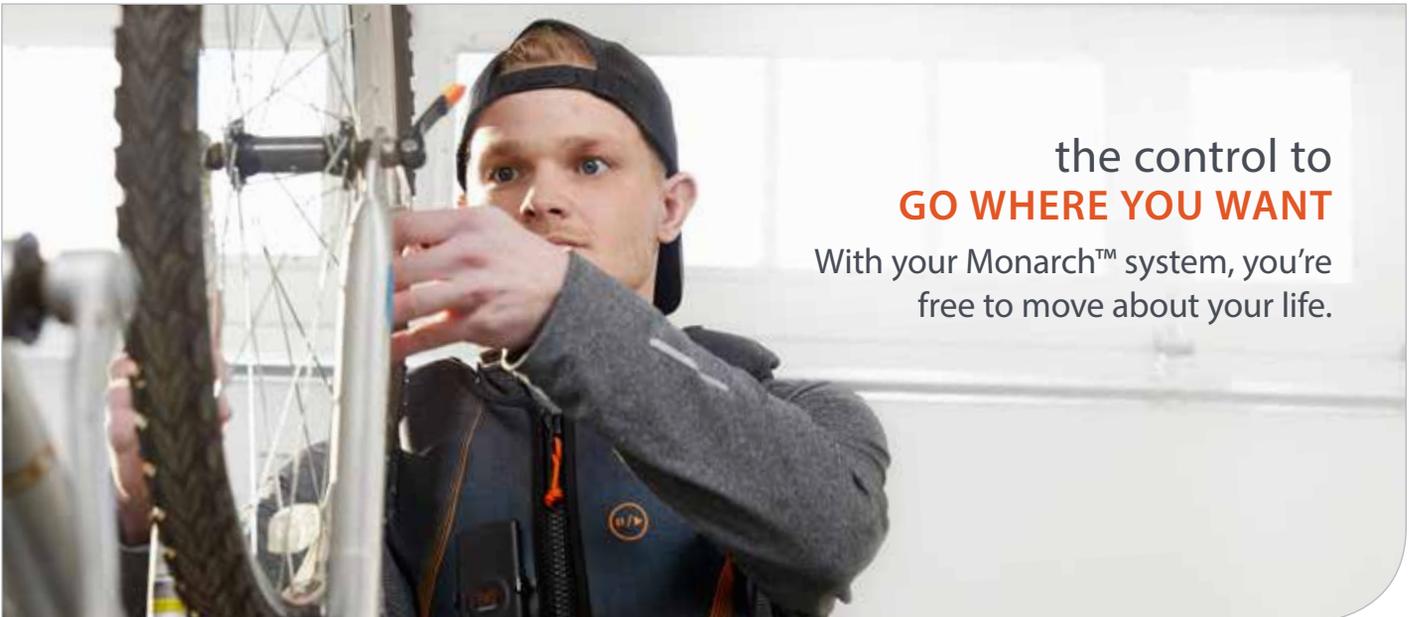

the control to
MULTITASK

Do your hair. Do the laundry. Do what needs doing—and get your therapy done too.

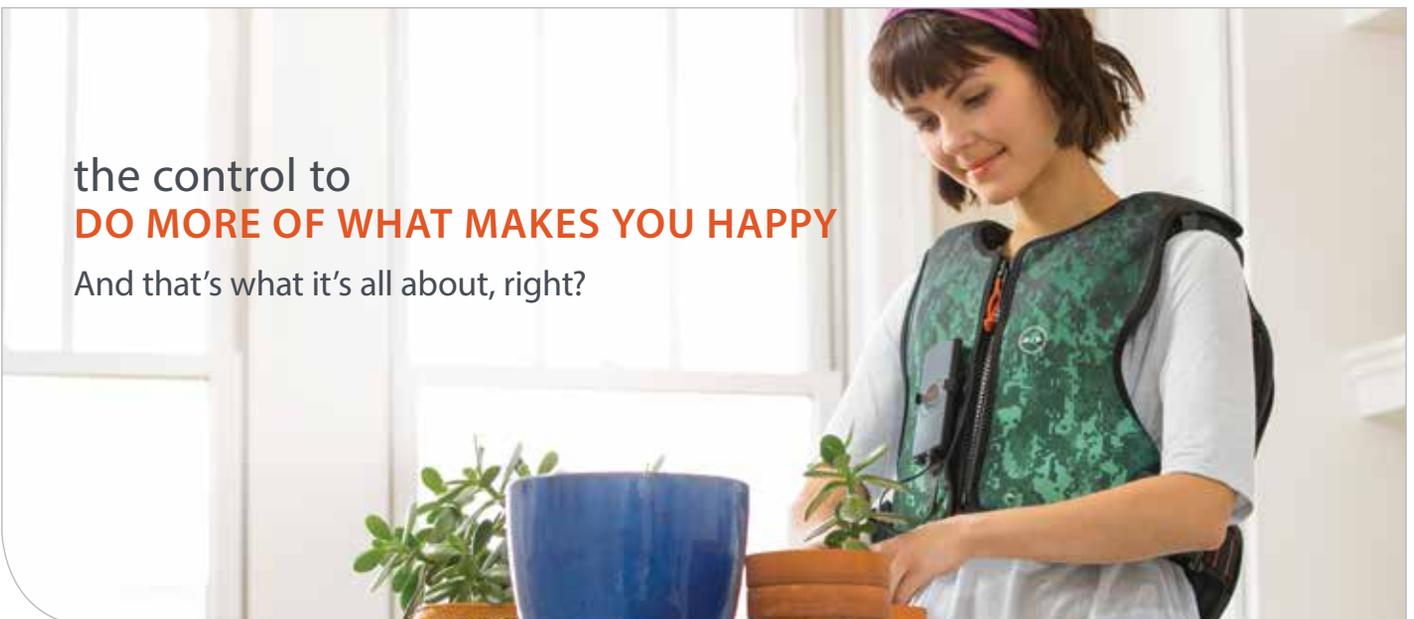

the control to
GO WHERE YOU WANT

With your Monarch™ system, you're free to move about your life.

the control to
DO MORE OF WHAT MAKES YOU HAPPY

And that's what it's all about, right?

MONARCH™

Inspired by you.

For nearly 30 years, Hill-Rom has been part of the lives of people with chronic respiratory diseases and conditions. Our signature product, The Vest® Airway Clearance System, has helped thousands of patients to clear the way for better days. We're proud of that. At the same time, we know how challenging it is to fit therapy into busy schedules. We've heard it again and again from patients: "I just want to live my life!" We get it. That's what inspired the Monarch™ Airway Clearance System. By allowing you to move freely, it opens a new world of possibilities for doing your therapy—your way.

How does your Monarch system help you take more control of your life? Share your story! #MyMonarch

The man behind the Monarch system

Marten De Vlieger and his sister, both CF patients, grew up with their mother manually performing CPT to help clear their airways. With a vision for more independence, Marten created a mobile therapeutic device for airway clearance. This novel device gave him the freedom to travel and live his adventurous, kite-surfing life while raising a family. Wanting others to experience this flexibility and control, he partnered with Hill-Rom to develop the Monarch Airway Clearance System.

Hill-Rom is a leading global medical technology company with more than 10,000 employees worldwide. We partner with health care providers in more than 100 countries, across all care settings, by focusing on patient care solutions that improve clinical and economic outcomes in five core areas: **Advancing Mobility, Wound Care and Prevention, Patient Monitoring and Diagnostics, Surgical Safety and Efficiency and Respiratory Health.** Hill-Rom's people, products and programs work towards one mission: **Every day, around the world, we enhance outcomes for patients and their caregivers.**
