

Introducing the VisiVest™ System
Enhancing Your Connections.
Your Care.
And Your Life.

Enhancing outcomes for
patients and their caregivers:

Connected in Care

You are not alone on your journey with airway clearance.

Your care team is there for you every step of the way, helping you manage your illness and live your best life. So it makes sense to do as much as possible to help everybody work better as a team.

That's the idea behind the new Bluetooth-enabled VisiVest™ Airway Clearance System. The VisiVest System connects you with your care team, sending data about your therapy sessions so you can collaborate in making tailored care decisions.*

Let's Do this Together

Why the VisiVest™ System?

Airway Clearance Therapy is an extremely important component in treating chronic lung disease. It plays a vital role in maintaining lung function and keeping you feeling your best.

But the reality is it's not always easy to manage, with everything else that's going on in your life.

That's why Hill-Rom developed the VisiVest System.* By automatically transmitting detailed information about your sessions to you and your team, it takes away the burden of tracking treatments.** That's one less thing to deal with.

More important, the VisiVest System provides accurate information. No guesswork, no approximating. When your team has accurate data about your vest usage, they're better able to understand your therapy sessions, adjust your settings to your needs, and help you make informed decisions about your care plan.

* The VisiVest System transmits data about vest usage. It does not make care decision recommendations.

** The VisiVest System is intended to provide airway clearance therapy when external manipulation of the thorax is your physician's choice of treatment.

Trusted Technology, Bluetooth-enabled**

The first Airway Clearance System with Bluetooth® connectivity, the VisiVest™ Airway Clearance System is the next generation of The Vest® System, the most widely used and trusted system today.

The Vest® System has been prescribed by more clinicians than any other system for good reason:

- Its market-leading High Frequency Chest Wall Oscillation (HFCWO) technology applies gentle pressure to the chest wall, efficiently treating all lobes of the lung.
- It's easy to use. No special positioning or complicated breathing techniques are required.
- It helps you breath easier, effectively removing accumulated secretions to reduce exacerbations.¹

Now Bluetooth enabled, the VisiVest System gives you prompt treatment feedback through the VisiView® Health Portal, to help you stay motivated and keep on track with your therapy sessions.

THINK OF IT AS A FITNESS TRACKER FOR YOUR LUNGS.

The VisiVest™ System vest garments come in a variety of popular colors and patterns, in soft, brushed fabric that's machine washable and dryable. Its high-tech multi-layer design has a comfy, breathable 3D mesh lining, and an easy-on and off buckle closure.

ADHERENCE SCORE

HMR RUNRATE

“I’ve been using the VisiVest™ System to track my vest treatments and it lets my parents and my health care team see how many treatments I’m doing each week. It puts a lot of responsibility on myself, but it also motivates me and challenges me to take care of myself and actually do my therapies. It’s really nice to tell my doctor, ‘okay, I can prove to you how many vest treatments I’m doing.’ I feel good about myself.”

- NIK JOB, CF PATIENT AND HILL-ROM EMPLOYEE

“Managing my daughter’s CF can be difficult on top of everything else going on in our lives—between Taylor’s dance, school and friends, it’s easy to say “I can’t do my treatment tonight.” Having a tool to give Taylor, myself and Taylor’s health care team the visibility into her treatment sessions is incredibly valuable. This allows us to work together to keep Taylor as healthy as possible.”

-STEPHANIE HAMMAR, CF PARENT AND HILL-ROM EMPLOYEE

MISSED THERAPY DAYS

SETTING DEVIATION DAYS

If You're a Patient

Whether you're just starting to take charge of your own treatment or you've done it for years, the VisiVest System helps to make your life easier and your therapy sessions more informative. The VisiVest™ System:

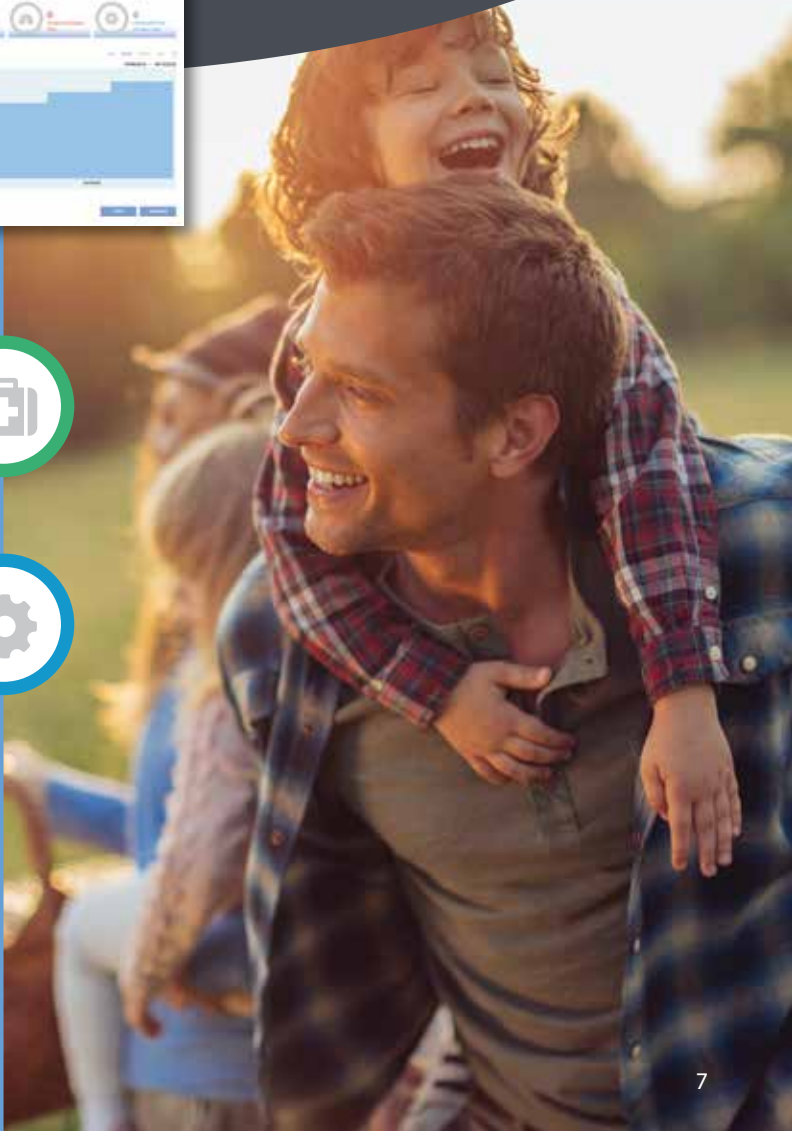

- Saves you the time and trouble of manually tracking your treatments, automatically providing accurate information for you and your team.

- Connects you with your care team, so you can all work better together and make informed decisions about your care.*

- Motivates you to stay on track by giving you prompt feedback on your sessions.

- Helps keep your lungs clear so you can live the life you want.

If You're a Parent

As a parent of a child with lung disease, you want to do everything you can to give your child the best possible care today—and form healthy habits for the future. The VisiVest System helps you do both:

- Automatically records treatments for you, so you've got one less thing to keep track of.
- Encourages healthy routines that your child can continue into adulthood.
- Uses colorful visual cues, called "badges" to give feedback about how well your child is adhering to his or her care plan.
- Connects you and your child with your care team, so you can all work better together to make informed decisions about his or her care.*
- Helps your child feel his or her best, now and in the future.

Hill-Rom is a leading global medical technology company with more than 10,000 employees worldwide. We partner with health care providers in more than 100 countries, across all care settings, by focusing on patient care solutions that improve clinical and economic outcomes in five core areas: **Advancing Mobility, Wound Care and Prevention, Patient Monitoring and Diagnostics, Surgical Safety and Efficiency and Respiratory Health.** Hill-Rom's people, products and programs work towards one mission: **Every day, around the world, we enhance outcomes for patients and their caregivers.**
